

## Head Office - Fuel Manager

### Features:

- ▶ Remote accessibility for your Xsite Fuel Management sites
- ▶ Direct communication with XFM software at each site
- ▶ Comprehensive reporting capabilities for single sites or entire enterprise
- ▶ Monitors transfer status of reports coming from each site
- ▶ 'Common Reports' listing on main page allows for quick navigation to frequently accessed reports
- ▶ Easy-to-use, point-click, web-based interface
- ▶ 128 bit encrypted security

### Benefits:

Allows fuel and financial reconciliation from each site to be tracked and automatically transferred to and controlled at head office.

Maximizes efficiency, functionality and productivity

Enables consistency of control throughout multiple locations

Allows for simple monitoring of individual sites by using clear and concise comparison reporting

**Fuel Manager Head Office System** provides a complete fuel station management system that allows you to monitor all of your Xsite Fuel Management sites from one central location. Generate reports and analyze information, for specific sites, groups of sites, or for your entire chain.

### Site Reports

Access reconciliation reports from each of the sites in your company. Enables you to view reports that are submitted regularly from each site. Price changes that occur at the sites are also automatically reported at head office.

### Verify & Edit Reports

Head Office Software provides access to edit information found in reports that are submitted from sites. Verify report accuracy, or export reports in formats that are compatible with accounting and bookkeeping software.

### Enterprise Reporting

Compare reports between all sites within your enterprise. Enterprise reporting allows you to compare weekly, monthly and yearly reports using different categories. Report categories enable enterprise reporting on fuel sales, restaurant sales, store sales, and more. Comparisons between sites allows for progress monitoring and future sales projections.

### Users

XSite Fuel Manager Head Office Software allows users to logon to the head office server with a user ID and password. Each user has their own account, which is used to log the user's actions within the system. Roles can be defined for groups of users who have the same set of permissions, each user is assigned to a role to determine what they are allowed to do within the system.

### Custom Report Definitions

Xsite Fuel Manager Head Office Software allows for administrators to create their own report definitions. These definitions controls the order and section that a report is displayed in the menu system. Report categories can also be changed to reorder the report in the menu.
