

# Price Book Manager

## Features:

- ▶ Complete Price Book Management.
- ▶ Inventory Control Periodic Physical.
- ▶ Automatic Shelf Tag Generation.
- ▶ Automated Ordering Based On Sales.
- ▶ Integration to Wireless Devices.
- ▶ Strong Security.
- ▶ Head Office Communications.
- ▶ Connect to Major POS Systems.
- ▶ Employee Scheduling.
- ▶ Comprehensive Sales Reporting.

## Benefits:

- ▶ Enhanced capacity - greater automation allows you to deal with much larger volumes of business.
- ▶ Reduces costs - in the medium and long-term. Although set-up will be a one-off cost, integration will save time and money in the future.
- ▶ Improved accuracy - with back office software accessing the same data the chances of errors are greatly reduced.
- ▶ Staying competitive - efficient, timely service is vital. If your competitors run a more efficient, responsive service you could lose your customers to them.
- ▶ Improvement on use of resources.

**XSite Price Book Manager (XPBM)** manages your price book, maintains inventory stock levels, generates automated purchase orders based on historical sales levels and schedules your employees.. XPBM runs on a back office PC with Windows XP and 2000. It connects to:

- ▶ G-Site and Passport
- ▶ Bulloch Bt9000
- ▶ Ruby / Verifone
- ▶ Prism / VisualPOS

### Automatic Updates

Software updates and upgrades available through direct internet connection.

### Automated Purchase Order Creation

Let the computer order your products using predefined minimum / maximum criteria for each item. Cut ordering time in half.

### Integrated Palm Pilot Scanning Option

Keep your inventory up to date.

Do spot checks and receive orders on a scanner equipped Palm Pilot™ hand held computer.

### Communicates with Multiple Point of Sale Systems

Allows a chain of stores with many different types of point of sale systems to view reports and manage their price book through one piece of software.

### Easy to Use Price Book Management

Save time finding and editing your price book. Intelligent product look ups and editing features gets the job done quicker.

### Reports on Sale Trends at the Item Level

Report on the average sales for each item at the day level. Determine the best location for your products based on historical sales data.

The screenshot shows the 'Items' window in XSite Price Book Manager. It displays a 'Monthly Sales Summary' for item PLU 1943 (Description: 7UP 1L). The summary includes a bar chart showing monthly sales from Jan '07 to Oct '08. Below the chart is a table with columns: Month, Sold, Sales, Cost, Margin. Summary statistics on the right include YTD Sold (62), YTD Sales (126.48), YTD Cost (91.68), and YTD Margin (27.5%). A note indicates the item is trending upwards on average 0.2 units per month.

The screenshot shows the 'Enter Password' dialog box. It contains a dropdown menu for 'Employee' set to 'Site Administrator' and a password field with masked characters. There are 'Logon' and 'Exit' buttons at the bottom.

## Departmental Inventory Valuation
