

Price Book Manager Head Office

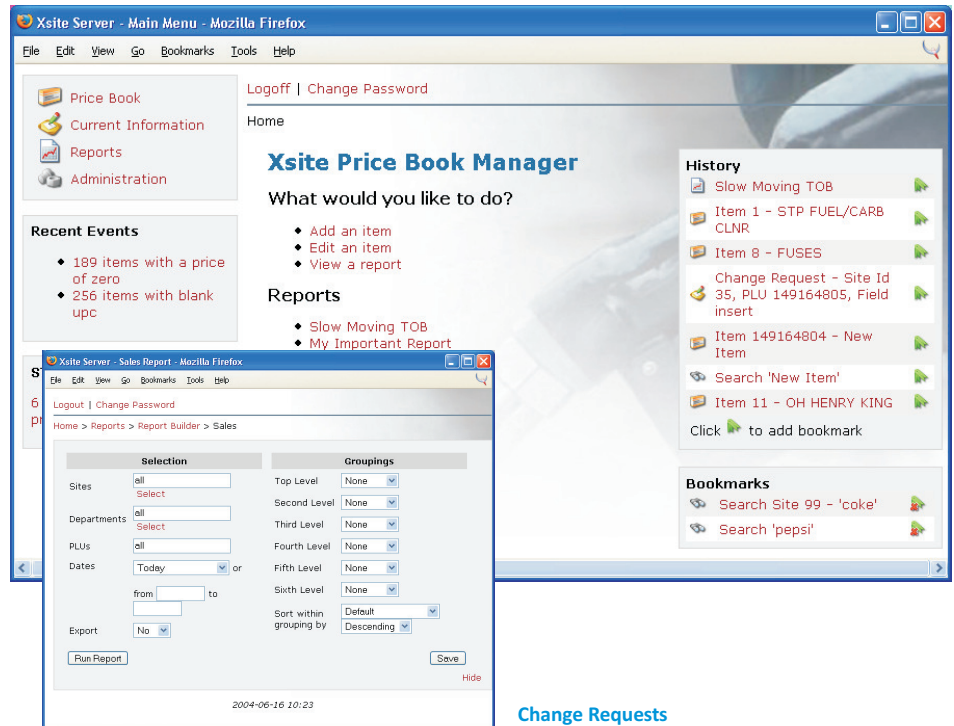

Features:

- ▶ Remote accessibility for your Xsite Price Book Management sites.
- ▶ Communicates directly with XPBM software.
- ▶ Comprehensive reporting capabilities for single or multiple sites.
- ▶ Download and upload item information to XPBM.
- ▶ Custom Report Builder allows reporting on information that is specifically relevant to your company.
- ▶ History, bookmarks and recent event log on main page allow for quick navigation and easy accessibility to common actions.
- ▶ Easy-to-use, point-click, web-based interface.

Benefits:

- ▶ Allows item and employee information to be tracked and automatically transferred to and controlled at head office.
- ▶ Maximizes efficiency, functionality and productivity.
- ▶ Enables consistency of control throughout multiple locations.
- ▶ Decreases time spent making changes at individual locations

Price Book Manager Head Office System provides complete store management system that allows you to control all of your Xsite Price Book Management sites from one central location. Generate reports, analyze information, and change pricing and costs for specific sites, groups of sites, or for your entire chain.

Sites

Each of the sites in your company are assigned a site record. This record is used to denote the items, suppliers, etc., that are available for that specific site. Each site is also assigned to a single region. This region is used to easily make changes for all the sites within a single region.

Users

A user may logon to the head office server with a user ID and password. This account is used to log the user's actions within the system. Roles can be defined for groups of users who have the same set of permissions, each user is assigned to a role to determine what they are allowed to do within the system.

Items

Change item information at one central location. Items are listed as an exact replication of the item as it appears at the site. Any changes made to items will be applied to the store items automatically during the nightly transfer.

Price Book

Common information that does not change between sites is stored in the item price book. This represents your PLU's, descriptions, departments, groupings, etc.

XSite Group Inc.

16-140 Welland Avenue,
St. Catharines, Ontario Canada L2R 2N6

www.xsitesoftware.ca | dwcook@xsitesoftware.ca
Toll Free: 888-346-0864 Ph. 905-346-0864

Change Requests

Change requests can be submitted to modify a single field in a specific item for a particular site. Each change request is applied to the site items during the nightly transfer.

Batch Changes

Make batch price changes based on department and price. Change the vendor for a group of items.

Item Information

Information for each item is displayed on the handheld device by PLU, UPC code, product description, part number, price, cost and units on hand.

Reporting

The Report Builder allows you to create custom sales reports by selecting sorting options, selection options and groupings. These settings are then saved, making your custom report settings available to be generated at any time. Reports can be set to global, making them available to any user, or local, available to only the user who created them.
